

AGYC Policies & Procedures

[As Revised September, 2020]

(RED BOLD is new language; red *italics-strikethrough* is deleted language)

APPENDIX D - CONSTRUCTION GUIDELINES

* * * * *

VIII. CULVERT INSTALLATION

1. Any work done in the AGYC right-of-way's requires a permit from the B&A Committee. A **12"** culvert ~~is *may-be*~~ required under all driveways or pathways that cross any AGYC owned ditch or drainage area, **unless a smaller culvert is as-** determined **adequate for drainage and runoff** by the Roads & Drainage Committee. ~~*Any variance to this requirement must be documented in writing by the B&A Committee.*~~ All culverts must be installed per specifications provided by the **Roads & Drainage** ~~*B&A*~~ Committee and signed off by a B&A Committee representative with a copy kept in the owner's file.
2. Culvert installation will be the first construction activity performed, except for planning and septic design activities, and must precede all site work, **unless otherwise approved by the Roads & Drainage Committee.**
3. The culvert will be installed at the location shown on the plot plan submitted with the Construction Permit application.

PURPOSE OF AMENDMENT:

Consistency with existing R&D responsibilities and Appendix F - Drainage Policy
